

We cannot vote fascism out of society!

Start to take action now!

There are elections in Saxony in September. After the local and European elections, we all know that things are not looking good.

We are witnessing how society is once again becoming enthusiastic about ideas that many thought were a thing of the past – along with their original leaders. But fascism did not disappear with the end of the Second World War! Rather, it has been fighting for its survival ever since, waiting for the perfect moment to re-establish itself.

But it has never just been the AfD that serves right-wing and authoritarian narratives. The CDU in Saxony has been pursuing right-wing policies in this country since reunification. The AfD is partly a radical right-wing party and has made many things sayable and leveled the ground. But neither the countless deaths in the Mediterranean nor the inhumane deportation laws have ever required AfD participation in government at federal level! The CDU, SPD, FDP and, at federal level, the Greens have managed this all on their own. We are in the midst of an authoritarian turnaround.

In view of the current situation, we have come to realize:

- We are experiencing a massive shift to the right, driven by the AfD and supported by other established parties.
- Instead of solidarity and mutual help, mistrust and anger are growing.

- Some of us are thinking about leaving Dresden at the end of the year.
- Others feel resigned and powerless in the face of current developments.

How can we manage to remain or become resistant and active despite this?

It can't stay like this! Many things will change, it is up to us to determine the direction! And our answer to this looming right-wing danger can't just be a cross on a ballot paper!

So let's get active together, even away from parliamentary politics. Let us set an example of civic engagement. Let's make mutual help, justice, openness and friendliness the standard in our dealings with one another. And please - don't move to Berlin or anywhere in the West! The movement HERE needs you!

You are asking yourself if and how you can get involved against this misery? Turn this page to find a few possibilities that might get you started!

Get involved!

Kritische Einführungstage is an initiative at TU Dresden aiming to ease a start into critical thinking and political work. **Plenary: every Wednesday, 15:00h, TU Dresden**
